

Arizona State University Online

Access to educational excellence

Where do you want to go in life?

Who do you want to be?

What do you want to achieve?

Whether you're a working parent with concrete career-change plans, looking to finish your degree, or a student enrolling for the first time, Arizona State University can help you reach your educational & career goals –

with flexible degree programs that let you learn in your own way,

100% online.

The ASU Advantage

ASU offers much more than eLearning classes: we provide online students with a total college experience.

By leveraging state-of-the-art technology & innovative program design, we deliver our exceptional academic culture & stimulating educational environment directly to our students – **wherever they live & whatever their lifestyle.**

The country's largest public university – Over 82,000 students, with more than 12,000 earning degrees 100% online

A distinguished faculty – Online courses are taught by the same professors who teach ASU's on-campus classes

70 online degree programs – Undergraduate, graduate & doctoral-level studies that meet the same rigorous academic standards as our on-campus programs

Unique academic & private sector partnerships – Collaborative partnerships with other schools & businesses are formed to enhance online teaching & learning experiences

A use-inspired research institution – Faculty & student scientists collaborate on projects to solve real-world problems

Community & communication – Group projects & online discussion boards promote a level of in-depth dialogue between students & professors that transcends the limitations of a classroom setting

How the Online Campus Works

Everything students need to manage their educational experience is accessible anytime, anywhere, from any device through MyASU, our easy-to-use online & mobile portal:

Flexible scheduling – Online students learn on their own schedule, completing weekly assignments instead of attending class at a set time & place

Interactive multimedia course content – ASU faculty work with instructional designers to create engaging online course modules that incorporate text, videos, games, simulations & other media

Accelerated courses – Shorter 7.5-week terms (vs. 16 week semesters) help busy students balance work, family & school by studying fewer subjects more intensively for shorter periods

Academic resources – Full access to comprehensive online research libraries that include databases, electronic journals, e-books & over 100 additional technology tools and materials

One-on-one support – Success Coaches provide personalized online & phone counselling throughout students' academic careers, whether they need to improve their time management or study skills, or simply talk through a challenging situation

ROI: The Value of an ASU Degree

Whether studying online, or on one of ASU's 5 physical campuses, students earn the same exact degree – and an ASU diploma is highly respected by prospective employers. That's why ASU is considered:

A New American University

Arizona State University is committed to expanding opportunities that help learners **succeed** in the global, digital economy.

One of the most profound expressions of ASU's New American University ideal is a first-of-its-kind collaboration with Starbucks, through which any of their 100,000+ U.S. partners (employees) with 60 or more college credits can receive full tuition reimbursement for any undergraduate degree program offered through ASU's online campus.

Online Education: The Facts

7.1 million students take at least one online class – 1/3 of all college students

15% of college graduates who took online classes have earned degrees entirely online

62% of colleges surveyed offer online degree programs

You can channel your passions into a rewarding career – **with online learning as your roadmap to success.**
